I Hereby certify that the above named mare
 (Name of Veterinarian / Technician)

was inseminated with fresh chilled frozen semen

from the (Paint / Quarter Horse / Thoroughbred) stallion

..... Registration No.:
 (Stallion name)

On the following dates -

.....

I, the attending veterinarian/technician, hereby certify the above mare was identified to match a copy of her registration certificate, of which I have signed a copy and that this mare was inseminated with the semen from the stallion listed above.

Signature of attending Veterinarian

And / or

Signature of attending technician

- Mare owner's copy of this form must be submitted with the registration application for the resulting foal, along with the usual mare owner's copy of a service certificate.
- Stallion Owners copy of this form must be submitted with the annual Breeding Return along with the office copy of the service certificate.

I have read and understand all requirements relating to Rule 117. ARTIFICIAL INSEMINATION (AI) as published in the PHAA Rulebook. (See reverse of form)

Signature of mare owner:Date: /.../.....

117. ARTIFICIAL INSEMINATION (AI)

GENERAL

- (a) All stallions accepted for registration or listing with the PHAA may use Artificial Insemination for breeding purposes.
- (b) Where Artificial Insemination is used as the breeding method, breeding certificates and breeding returns must record this information. An Insemination certificate for each mare bred, must be completed and lodged with the stallion breeding return. The insemination certificate must be completed by the attending Veterinarian or other authorised AI technician.
- (c) It is recommended that foreign owners of stallions appoint a PHAA member resident in Australia as an agent to sign all relevant documentation. An agent's form should be lodged in accordance with Rule 12.
- (d) The foreign owners of stallions not located in Australia are required to hold PHAA membership (Paint stallions only) unless they appoint a PHAA member resident in Australia as an agent to sign all relevant documentation.

In addition to the above, the following specific rules apply

CHILLED FRESH SEMEN

- (e) For mares bred using chilled fresh semen, breeding returns and stallion service certificates must be signed by the recorded stallion Owner or Owner's agent.

FROZEN SEMEN

- (f) If frozen semen is being imported from a foreign registered stallion, that stallion must be registered or listed with the PHAA prior to breeding. (refer Rule 101)
- (g) All foals conceived through the use of frozen semen shall be parentage DNA tested and validated prior to registration with the PHAA. No foal will be accepted for registration unless both sire and dam have parentage DNA test results on record with the PHAA.
- (h) There are no limitations to the period of time the semen can be stored or utilised after the death or gelding of a stallion.
- (i) Frozen semen from deceased stallions will be accepted for registration or listing, with the PHAA provided the stallion has been registered and upgraded for breeding purposes with an approved registration authority in its country of origin. The last registered owner of the stallion must authorise the listing or registration with the PHAA
- (j) Should the stallion be sold, die or be gelded, the PHAA must be notified by the registered owner.
- (k) **Frozen semen owned by someone other than the Stallion Owner**

In the case where frozen semen from a stallion registered or listed with the PHAA is purchased by someone other than the registered Stallion Owner, the purchaser may record this information with the PHAA. In such cases the following rules apply:

- i. A registration of Frozen Semen Ownership application may be lodged together with the proscribed fee. The signature of the current recorded stallion owner or agent, or evidence from the registered stallion owner or agent at the time of purchase, must be provided.
- ii. Upon approval of the application a certificate for registration of Semen Ownership may be issued by the PHAA which allows the owner of the semen to sign and lodge breeding returns for the stallion whose semen they own. A copy of the semen ownership certificate must be included with the stallion breeding return.
- iii. The registered owner of semen is only authorised to lodge breeding returns and service certificates for the semen which they own. These breeding returns can be in addition to returns lodged by the stallion owner or other owner(s) of semen.
- iv. A certificate for Registration of Semen Ownership may only be cancelled by the registered owner of the semen.
- v. A certificate for the Registration of Semen Ownership may be transferred to a new owner upon completion of a transfer form and payment of the prescribed fee.
- vi. For all transactions, including registration, transfers and lodging of breeding returns for frozen semen, the Semen Owner must be a current financial member of the PHAA.
- vii. In no case will the PHAA assume any responsibility on settling any contractual or civil matter that arises regarding ownership or otherwise of frozen semen.
- viii. The Board of Directors reserves the right to deny or accept applications for Semen ownership on a merit and case by case basis.**
